MONTHLY ECONOMIC INDICATORS

March, 2017

FOREWORD

Monthly Economic Indicators (MEIs) is a monthly report produced with a month lag and spearheaded by the Modelling and Forecasting team of the Economic Management Department in the Ministry of Finance.

The MEIs provide regular updates on developments in both the domestic and global economy. It is, therefore, an essential tool in providing timely and relevant information to domestic and international investors to aid their business decision making.

This publication covers economic indicators of the four main sectors of the economy, namely; real, external, monetary and fiscal sectors (central government operations). The MEI also includes a commentary on other key economic indicators such as sovereign bond trading.
