

Policy and funding strategies to improve service delivery in water, sanitation and hygiene

6–8 June 2018
Cape Town, South Africa

Programme

The Value for Money in WASH sub-programme aims to strengthen the linkages between Ministries of Finance and Ministries in charge of Water, Sanitation and Hygiene (WASH). Understanding their complementary roles in policy and financing improves the provision of quality services for better WASH outcomes. The objective of the workshop is to provide a platform for a select number of African countries to present their strategies and approaches to meeting the WASH SDGs to their peers who will then offer comments/suggestions/recommendations to further strengthen their approach.
