

# Inclusive Budgeting and Financing for Climate Change in Africa (IBFCCA)

## Gender and Climate Change in Programme Design and Appraisal: Insights from Benin Virtual Workshop, 16 September 2021

### PROGRAMME

The workshop will consider how the integration of gender and climate change can be strengthened in program design, appraisal and approval. A new methodology was developed and applied to the agriculture and energy sectors in Benin. The event will share the lessons from this experience. It will provide an opportunity for officials from across the continent working in finance, budget, gender, environment/climate ministries and agencies, to gain practical experience in applying the gender and climate change impact assessment (GCCIA) method and provide feedback on how it can be strengthened.

Pretoria/ Harare time	Thursday 16 September 2021
